

RAMAIAH
Institute of Technology

CURRICULUM

for the Academic year 2020 – 2021

SCHOOL OF ARCHITECTURE

V & VI Semester B. ARCH

RAMAIAH INSTITUTE OF TECHNOLOGY

(Autonomous Institute, Affiliated to VTU)

Bangalore – 560054.

About the Institute:

Dr. M. S. Ramaiah a philanthropist, founded ‘Gokula Education Foundation’ in 1962 with an objective of serving the society. M S Ramaiah Institute of Technology (MSRIT) was established under the aegis of this foundation in the same year, creating a landmark in technical education in India. MSRIT offers 13 UG programs and 15 PG programs. All these programs are approved by AICTE. All the UG programs & 09 PG programs are accredited by National Board of Accreditation (NBA). The institute is accredited with ‘A’ grade by NAAC in 2014. University Grants Commission (UGC) & Visvesvaraya Technological University (VTU) have conferred Autonomous Status to MSRIT for both UG and PG Programs till the year 2029. The institute is a participant to the Technical Education Quality Improvement Program (TEQIP), an initiative of the Government of India. The institute has 380 competent faculty out of which 60% are doctorates. Some of the distinguished features of MSRIT are: State of the art laboratories, individual computing facility to all faculty members, all research departments active with sponsored funded projects and more than 300 scholars pursuing Ph.D. To promote research culture, the institute has established Centre of Excellence for Imaging Technologies, Centre for Advanced Materials Technology & Schneider Centre of Excellence. **M S Ramaiah Institute of Technology has obtained “Scimago Institutions Rankings” All India Rank 65 & world ranking 578 for the year 2020.**

The Centre for Advanced Training and Continuing Education (CATCE), and Entrepreneurship Development Cell (EDC) have been set up on campus to incubate startups. **M S Ramaiah Institute of Technology secured All India Rank 8th for the year 2020 for Atal Ranking of Institutions on Innovation Achievements (ARIIA), an initiative of Ministry of Human Resource Development (MHRD), Govt. of India.** MSRIT has a strong Placement and Training department with a committed team, a good Mentoring/Proctorial system, a fully equipped Sports department, large air-conditioned library with good collection of book volumes and subscription to International and National Journals. The Digital Library subscribes to online e-journals from Elsevier Science Direct, IEEE, Taylor & Francis, Springer Link, etc. MSRIT is a member of DELNET, CMTI and VTU E-Library Consortium. MSRIT has a modern auditorium and several hi-tech conference halls with video conferencing facilities. It has excellent hostel facilities for boys and girls. MSRIT Alumni have distinguished themselves by occupying high positions in India and abroad and are in touch with the institute through an active Alumni Association.

As per the National Institutional Ranking Framework, MHRD, Government of India, M S Ramaiah Institute of Technology has achieved 59th rank among 1071 top Engineering institutions of India for the year 2020 and 1st rank amongst Engineering colleges (VTU) in Karnataka

SCHOOL OF ARCHITECTURE

Ramaiah Institute of Technology (RIT), Bangalore, is a leading institution offering undergraduate, postgraduate and research programs in the areas of engineering, management and architecture. The institute was established in the year 1962, under the aegis of Gokula Education Foundation. Its mission is to deliver global quality technical education by nurturing a conducive learning environment for a better tomorrow through continuous improvement and customization.

The School of Architecture, RIT Bangalore, was established in the year 1992. Since its establishment, the School has played a vital role in providing quality education. The Council of Architecture (COA) and All India Council for Technical Education (AICTE) have recognized this program.

The mission of the school is to uphold the RIT mission and to thus provide quality education to the students and mould them to be excellent architects with adequate design and management skills and noble human qualities.

Full time faculty members having postgraduate qualifications from prestigious institutions in India and abroad are teaching at The School of Architecture. Experienced and well-respected practicing architects are invited to provide their experiences as visiting faculty. New milestones are continually being set and achieved. The synergy of the progressive management, committed faculty and students are ensuring excellent academic results year after year. This is reflected in the high number of University ranks that are secured by the students of the School.

The School of Architecture is now autonomous (affiliated to VTU) providing scope for further improvement. The focus has been towards fostering novel concepts and solutions in Architectural Design. The student's response is very encouraging, and the school recognizes and appreciates such good students by awarding them. After graduation, many students have pursued higher studies in various universities in the country and abroad. There is a great demand for the school graduates in the industry and the School is developing initiatives towards co-branding of the industry and the School. Many students have started their own enterprise and architectural practices as well.

All this has been possible as a result of the efforts of the impeccable faculty of the School. The faculty is committed to the welfare and success of the students. The teachers of the school are also engaged in enhancing their knowledge and skills and many are engaged in research activities as well. The School has experts in specialized disciplines like Habitat Design, Product Design, Urban Design, Urban Planning, Landscape Architecture, and Interior Design. The faculty also actively participates in national and international conferences and publishes and presents papers.

The School as part of a consultancy had started off with the maiden project to redevelop the RIT engineering college campus and is now involved in various campus designs.

VISION OF THE INSTITUTE

To be an Institution of International Eminence, renowned for imparting quality technical education, cutting edge research and innovation to meet global socio-economic needs.

MISSION OF THE INSTITUTE

MSRIT shall meet the global socio-economic needs through -

- Imparting quality technical education by nurturing a conducive learning environment through continuous improvement and customization.
- Establishing research clusters in emerging areas in collaboration with globally reputed organizations.
- Establishing innovative skills development, techno-entrepreneurial activities and consultancy for socio-economic needs.

QUALITY POLICY

We at MS Ramaiah Institute of Technology strive to deliver comprehensive, continually enhanced, global quality technical and management education through an established Quality Management System complemented by the synergistic interaction of the stake holders concerned.

VISION OF THE DEPARTMENT

To achieve and propagate high standards of excellence in architectural education.

MISSION OF THE DEPARTMENT

- The School's commitment is to prepare people to make a difference;
- To create an environment that shall foster the growth of intellectually capable, innovative and entrepreneurial professionals, who shall contribute to the growth of the society by adopting core values of learning, exploration, rationality and enterprise; and
- To contribute effectively by developing a sustainable technical education system to meet the changing technological needs incorporating relevant social concerns and to build an environment to create and propagate innovative designs and technologies.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs):

- PEO 1:** Use the knowledge and skills of Architecture to analyze the real-life problems and interpret the results.
- PEO 2:** Effectively design, implement, improve and manage the integrated socio-technical systems.
- PEO 3:** Build and lead cross-functional teams, upholding the professional responsibilities and ethical values.
- PEO 4:** Engage in continuing education and life-long learning to be competitive and enterprising.

PROGRAM OUTCOMES (POs):

PO1: Architectural knowledge: Apply the knowledge of mathematics, science, architectural fundamentals, and an architectural specialization to the solution of complex architectural problems.

PO2: Problem analysis: Identify, formulate, review research literature, and analyse complex architectural problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

PO3: Design/development of solutions: Design solutions for complex architectural problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

PO4: Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5: Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern architectural and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The architect and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional architectural practice.

PO7: Environment and sustainability: Understand the impact of the professional architectural solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the architectural practice.

PO9: Individual and teamwork: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

PO10: Communication: Communicate effectively on complex architectural activities with the architectural community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11: Project management and finance: Demonstrate knowledge and understanding of architectural and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

PO12: Life-long learning: Recognize the need for and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM SPECIFIC OUTCOMES (PSOs):

- a) Apply knowledge and skills of arts and sciences to the various architectural scenarios.
- b) Design and develop projects based on function, form and analysis.
- c) Design and improve integrated systems of people, materials, information, facilities, and technology.
- d) Function as a member of a multi-disciplinary team.
- e) Identify, formulate and solve industrial requirements and problems.
- f) Understand and respect professional and ethical responsibility.
- g) Communicate effectively both orally and in writing.
- h) Understand the impact of design solutions in a global and societal context.
- i) Recognize the need for and an ability to engage in life-long learning.
- j) Have knowledge of contemporary issues in industrial and service sectors.
- k) Use updated techniques, skills and tools of architecture throughout their professional careers.
- l) Implement the concepts of project and construction management to satisfy customer expectations.

BOARD OF STUDIES FOR THE TERM 2020 - 2021

- | | | |
|-----|-------------------------------|--------------------------|
| 1. | Prof. (Dr.) Pushpa Devanathan | Chairperson |
| 2. | Ar. Chitra Vishwanath | VTU Nominee |
| 3. | Ar. Vidyadhar S. Wodeyar | External Industry Expert |
| 4. | Ar. Prasad G | External Industry Expert |
| 5. | Dr. Rama R S | Academician |
| 6. | Dr. Chidambara Swamy | Academician |
| 7. | Ar. Subbiah T S | Alumni Industry Expert |
| 8. | Prof. Vishwas Hittalmani | Member |
| 9. | Prof. (Dr.) Rajshekhar Rao | Member |
| 10. | Dr. Rashmi Niranjana | Member |
| 11. | Ar. Meghana K Raj | Member |
| 12. | Ar. Reema H Gupta | Member |
| 13. | Er. Vijayanand M | Member |

SCHOOL OF ARCHITECTURE

TEACHING FACULTY

Sl No	Name	Qualification	Designation
1	Prof. Pushpa Devanathan	M Arch, P.G.D.I. (PhD)	Professor & HOD
2	Prof. Vishwas Hittalmani	M Des	Professor
3	Prof. Rajshekhar Rao	M L Arch (PhD)	Professor
4	Prof. Jotirmay Chari	M Arch (PhD)	Professor
5	Ar. Prasad G	M Arch	Professor (Tenure Faculty)
6	Dr. Rashmi Niranjana	MFA (Fine arts), PhD	Associate Professor
7	Dr. Monalisa	M Arch, PhD	Associate Professor
8	Ar. Surekha R	M L Arch	Associate Professor
9	Ar. Lavanya Vikram	M L Arch (PhD)	Associate Professor
10	Ar. Sudha Kumari	M Arch – Habitat Design (PhD)	Associate Professor
11	Ar. Meghana K Raj	M L Arch	Associate Professor
12	Ar. Tejaswini H	M L Arch	Associate Professor
12	Ar. Reema Harish Gupta	M Arch – Urban Design	Associate Professor
13	Ar. Mallika P V	M L Arch	Associate Professor (Tenure Faculty)
14	Ar. Sudhir Chougule	M L Arch	Associate Professor (Tenure Faculty)
15	Ar. Nikhil V Wodeyar	P G Dip – Urban Design	Associate Professor (Tenure Faculty)
16	Ar. Ashwini Mani	M Arch – Advanced Architecture	Assistant Professor (Tenure Faculty)
17	Er. Vijayanand M	M Tech (PhD)	Assistant Professor
18	Er. Aruna Gopal	B E	System Analyst
19	Ar. Shiv Deepthi Reddy	M Arch	Assistant Professor
20	Ar. Kriti Bhalla	B Arch	Assistant Professor

21	Ar. Aishwarya Yoganand	M Sc – Sustainable Building Systems	Assistant Professor
22	Ar. Divya Susanna Ebin	M Arch – Urban Design	Assistant Professor
23	Ar. Yashas Hegde	M Arch – Urban Design	Assistant Professor
24	Ar. Arpita Sarkar	M L Arch	Assistant Professor
25	Ar. Jyotsna Rao J	M L Arch	Assistant Professor
26	Ar. Ranjitha Govindaraj	M L Arch	Assistant Professor
27	Ar. Trisha Sinha	M Tech (Infrastructure systems)	Assistant Professor
28	Ar. Theju Gowda	M Sc - Architecture	Assistant Professor
29	Ar. Akshata Shagoti	M Arch – Architectural Design	Assistant Professor
30	Ar. Amala Anna Jacob	M Arch – Urban Design	Assistant Professor
31	Ar. Meghana M	M A – World Heritage Studies	Assistant Professor
32	Ar. Sheethal B S	M Plan – Regional Planning	Assistant Professor
33	Ar. Megha Ann Jose	MIAD - Interior Architecture & Design	Assistant Professor
34	Ar. Pooja M Naik	M Arch – Urban Planning & Mgmt.	Assistant Professor

ADMINISTRATIVE STAFF

1	Mr. Nagesh B. L	Dip. in Mech Engg.	Instructor
2	Mrs. Ambika	M Tech	Assistant Instructor
3	Ms. Swathi P	B. Com	SDA

SUPPORT STAFF

1	Mr. Ramachandra Chari	Attender
2	Mrs. Varalakshmi R	Attender

BREAKDOWN OF CREDITS FOR B. ARCH DEGREE CURRICULUM (Semester I to X)
BATCH 2018 - 2023
(as per Council of Architecture)

SEMESTER – V

ARCHITECTURE DESIGN - IV

Course Code: AR501

Prerequisite: Nil

Course Coordinator: Prof. Pushpa Devanathan

Course Credits: 6 : 0 : 1

Contact Hours: 112 hours

Course objectives:

The students will be exposed to -

- The need for creating architecture in an urban setting.
- The role of symbolism, aesthetics, and function in architecture.
- Dealing with various services and materials.

Course contents:

UNIT - I

Design of a multi-functional public building in an urban setting

UNIT - II

Continuous emphasis on controls, codes, and byelaws.

UNIT - III

Exercises in articulation and manipulation of programmed needs.

UNIT - IV

Design methodology and criticism.

UNIT - V

Evaluation of alternate concepts and presentation.

Course outcomes (COs):

Students will be able to -

- a) Design buildings in urban settings. (PO: 3; PSO: c)
- b) Integrate developmental controls, codes, and byelaws in their design. (PO: 4; PSO: e)
- c) Articulate and criticize qualitative attributes of the spatial components of a multi-use and multi-user program. (PO: 4; PSO: h)
- d) Develop the Area Program and Design Methodology. (PO: 2; PSO: b)
- e) Explore various architectural concepts and their adaptation, also develop presentation techniques. (PO: 10; PSO: g)

Evaluation Pattern: Marks allocation for SEE

Subject Code	Subject Name	Design	Drawing	Viva Voce	Model
AR501	Architectural Design - IV	20	15	10	5

SEMESTER – V

BUILDING MATERIALS & CONSTRUCTION TECHNOLOGY – V

Course Code: AR502

Course Credits: 3 : 0 : 1

Prerequisite: Nil

Contact hours: 70 hours

Course Coordinator: Prof. Vishwas Hittalmani

Course Objectives:

Students are introduced to -

- The construction systems of special doors and windows.
- The fundamental principles of structural glazing and cladding.
- Pile foundations and medium span roofing systems.

Course Contents:

UNIT - I

Doors and windows: various building components like aluminum doors & windows and partitions, frameless glass doors and partitions, rolling shutter and collapsible shutter, Steel windows.

UNIT - II

Curtain wall systems: cladding, glazing, structural glazing, composite panels

UNIT - III

Foundations and medium span roof systems: Medium span steel roof truss, north light truss etc. and deep foundations

UNIT - IV

Material study: Anti-termite treatment to foundation, Masonry walls and woodwork, Water proofing materials and weather proofing materials like chemical admixtures and surface applications.

UNIT - V

Glass: Manufacture and various types such as plate, tinted, decorative, reinforced, laminate glass block and fiber glass, etching etc. fiber reinforced composite products and their applications.

Course Outcomes (COs):

The students will be able to -

- a) Identify the basic components of special doors, windows and their construction methods. (PO: 4; PSO: j)
- b) Draft and read architectural drawings and construction details for cladding and structural glazing. (PO: 1; PSO: k)
- c) Analyze and draw details of a truss. (PO: 2; PSO: a)
- d) Understand different materials and their applications in building. (PO: 1; PSO: k)
- e) Generate innovative details in construction. (PO: 4; PSO: k)

Evaluation Pattern: Marks allocation for SEE

Subject Code	Subject Name	Portfolio	Viva
AR502	Building Materials & Construction Technology V	40	10

SEMESTER – V

CONTEMPORARY ARCHITECTURE

Course Code: AR503

Prerequisite: Nil

Course Coordinator: Asst. Prof. Yashas Hegde

Course Credits: 3 : 0 : 0

Contact Hours: 42 hours

Course Objectives:

To enable the students to -

- Understand contemporary architectural trends
- Understand the ideas and philosophies of architects
- Study the contemporary architectural styles in detail.

Course Contents:

UNIT - I

Trends in contemporary architecture – Introduction and brief understanding, appreciation and comparison of general contemporary trends in Indian and Western architecture focusing on understanding, appreciation, ideas, and directions through the works of notable architects.

UNIT - II

Ideology and philosophy of Santiago Calatrava: Zoomorphism. Study works of Santiago Calatrava and Daniel Libeskind: Commemorative Architecture, deconstruction. Study works - ideology and philosophy of: Zaha Hadid, Rem Koolhaas, Frank O Gehry – Blobitecture. Ar. Norman foster, Ar. Tadao Ando, Ar. I M Pei.

UNIT - III

Ideology, Philosophy & Study works of Greg Lynn, Diller & Scofidio: Digital Architecture. Genetic Algorithm, Cybertecture and digital architecture and examples.

UNIT - IV

Post-independence architecture in India- ideology and philosophy of: Louis I Kahn. Laurie Baker: eco-friendly & vernacular architecture, ideology and philosophy & study works of Le Corbusier.

UNIT - V

Ideology and philosophy of Charles Correa: architecture of changing time and philosophy. Study works of Hafeez Contractor, ideology and philosophy of B.V. Doshi. Symbolism and Nationalism Ar. Raj Rewal & works of regional architects.

7. Sigfried Giedion, 'Space Time and Architecture – The Growth of a New Tradition'; Harvard University Press, 2008

Course outcomes (COs):

Students will be able to -

- a) Understand the evolution of contemporary architecture and analyse various Contemporary Architecture trends in Indian and World Architecture. (PO: 3; PSO: h)
- b) Analyse the philosophies of Zoomorphism, Deconstruction, commemorative Architecture and Blobitecture through examples and identify works based on philosophies. (PO: 6; PSO: h)
- c) Recognize the need and ideologies of Digital Architecture. (PO: 6; PSO: k)
- d) Draw conclusions through insight into the post-independence Architecture in India and its recognition of Eco-friendly and Vernacular designs. (PO: 7; PSO: h)
- e) Identify the influences and the changes in Indian Architecture through time. (PO: 6; PSO: h)

SEMESTER – V

SOCIOLOGY AND ECONOMICS

Course Code: AR504

Course Credits: 2 : 0 : 0

Prerequisite: Nil

Contact hours: 28 hours

Course Coordinator: Assoc. Prof. Reema H. Gupta

Course Objectives:

To familiarize students with -

- Basic concepts of Sociology.
- Basic concepts of Economics.
- Influences of Sociology and Economics on Architecture.

Course contents:

UNIT - I

Nature, Scope, Utility of Sociology, Relevance to Architecture. Elements of Society, society, community; origin and growth of societies.

UNIT - II

Characteristics of Rural and Urban communities. Migration, slums and other social problems.

UNIT - III

Social research, and social surveys.

UNIT - IV

Definition of Economics, Laws, goods and services, utility and marginal utility, value, valuation, concept of demand and supply

UNIT - V

Time value of money, Concept of life cycle cost analysis with respect to building, sources of finance of building

6. Linda Groat, David Wang, 'Architectural Research Methods', Wiley India Exclusive, 2018
7. Paul Samuelson William Nordhaus, 'Economics'; McGraw Hill Education, 2010

Course Outcomes (COs):

The students will be able to -

- a) Identify the social behavior of a society. (PO: 6; PSO: h)
- b) Outline the relationship between Sociology, Architecture & the Urban context. (PO: 6; PSO: h)
- c) Explain social research. (PO: 12; PSO: h)
- d) Understand the different economic considerations in a society. (PO: 6; PSO: h)
- e) Explain the relationship between Economics and Architecture. (PO: 6; PSO: h)

SEMESTER – V

ARCHITECTURAL STRUCTURES – V

Course Code: AR505

Prerequisite: NIL

Course Coordinator: Asst. Prof. M. Vijayanand

Course Credits: 3 : 0 : 0

Contact hours: 42 hours

Course Objectives:

To expose the students to -

- the concept and prestressing system, losses involved in the design methods of PSC elements.
- the design of structural steel members including connections.
- the design concept of masonry walls and understanding the concepts of special structural forms.

Course Contents:

UNIT - I

Principle of Prestressing: Introduction- Materials for Prestressed concrete, System and method of prestressing, analysis of sections, stress and strength concept, load balancing concept, effect of loading on tensile stresses in the tendons.

UNIT - II

Losses of PSC members: Analysis method of losses, elastic shortening, shrinkage of concrete, creep of concrete, relaxation, anchorage slip, friction.

UNIT - III

Connections: Bolted connection, Introduction- code of practice- bearing and friction type of bolts- joints subjected to moment and direct load and Welded connections, Introduction- code of practice – butt and fillet welds- weld symbols- joints subjected to shear and bending - joints subjected to shear and torsion.

UNIT - IV

Tension Member: Introduction- types of tension member- design consideration – design of tension members.

UNIT - V

Masonry Structures, Special Structural forms, and Tall buildings: Introduction to Masonry structure, design concepts, concept of Shell, folded plate, domes, grid structure, flat slab, tensile and pneumatic structure, and tall building concept.

References:

1. S. K. Duggal, 'Limit State Design of Steel Structures'; McGraw Hill Education, 2017
2. N. Krishna Raju, 'Prestressed Concrete'; McGraw Hill Education, 2012
3. K. U. Muthu, Ibrahim Azmi, Janardhana Maganti, M. Vijayanand, 'Prestressed Concrete'; PHI Learning, 2016
4. Alfredo Boracchini, 'Design and Analysis of Connections in Steel Structures: Fundamentals and Examples'; Ernst & Sohn, 2018

Course Outcomes (COs):

The students will be able to:

- a) Describe the principle of PSC and role of HSC and steel and design methods of PSC elements by the principles and requirements for prestressed concrete design and code of practice. (PO: 2; PSO: a)
- b) Evaluate the initial and time dependent losses. (PO: 2; PSO: c)
- c) Demonstrate the connection subjected to moment and to describe the concept of butt and fillet weld connections, design the welded joints subjected to shear and bending. (PO: 4; PSO: c)
- d) Illustrate the design of tension member and identify the friction type and bearing type of bolts. (PO: 4; PSO: a)
- e) Incorporate the concept of masonry wall, classification of walls, shells, domes, flat slab, pneumatic structures, grid structures, tensile structure. (PO: 2; PSO: c)

SEMESTER – V

BUILDING SERVICES – III

Course Code: AR506

Prerequisite: NIL

Course Coordinator: Prof. Vishwas Hittalmani

Course Credits: 3 : 0 : 0

Contact hours: 42 hours

Course Objectives:

To enable the students to -

- Study mechanical services in a building
- Integrate services with architectural design

Course Contents:

UNIT - I

Mechanical ventilation, ventilation for a cinema hall, Air-conditioning for human comfort & definitions, dust control and filters

UNIT - II

Air cycle, refrigeration cycle, components, air distribution - ducts, grilles etc., classification and application air-conditioning, heat load estimation & thumb rules.

UNIT - III

Window unit, split units without ducts, split unit with duct, package unit with ducts, direct Expansion system, Chilled Water System, humidifiers & dehumidifiers.

UNIT - IV

Introduction to vertical circulation, lift well, pit, doors, car, machine room etc. Typical section through lift, quality & quantity of service, types of lifts, lift bank, lobby and lift interiors, hydraulic & traction lift, escalator & travelator.

UNIT - V

Lift act, architect's role, double Decker lift, sky lobby, current scenario.

12. "National Building Code of India (NBC) 2016"; Part 8 Section 3 and 5 & Part 3 & 4; Bureau of Standards,
13. IS Codes –
 - 1391 (Part 1 & 2): 1992 - Specification for room air conditioners
 - 8148: 2003 - Specification for packaged air conditioners
 - 4591: 1968 - Code of practice for installation and maintenance of escalators
 - 14671: 1999 - Hydraulic lifts
 - 14665: 2000 - Traction lift
 - 15259: 2002 - Home Lifts 15330: 2003 - Lifts for handicapped persons

Course Outcomes (COs):

The students will be able to -

- a) Incorporate mechanical services in a building. (PO: 3; PSO: c)
- b) Explain fundamentals of air conditioning. (PO: 1; PSO: a)
- c) Integrate the understanding of air conditioning in their architectural design. (PO: 1; PSO: a)
- d) Provide vertical circulation in a building as per requirements and context. (PO: 3; PSO: c)
- e) Apply prevailing acts and norms while designing mechanical lifts for any building. (PO: 4; PSO: e)

SEMESTER – V

LANDSCAPE DESIGN

Course Code: AR507

Prerequisite: NIL

Course Coordinator: Assoc. Prof. Surekha R.

Course Credits: 2 : 0 : 1

Contact hours: 42 hours

Course Objectives:

To expose the students to -

- Introduction of Landscape Design
- Integration of landscape design with architectural design
- Develop basic skills required to handle simple landscape design projects

Course Contents:

UNIT - I

Introduction of Landscape Design, Garden design introduction, Types of garden, Design considerations for residential gardens, fundamental principles of landscape design. Introduction to landscape elements and street furniture's and their application and maintenance.

UNIT - II

Taxonomy, units of taxonomy, systems of classification, Botanical names, and common names of plant materials with site visits. Basic classification of Plant material - Trees, shrubs, creepers, and ground covers.

UNIT - III

Site planning principles, presentation, zoning, and accessibility. Site analysis.

UNIT - IV

Landscape architect's philosophies and works.

UNIT - V

Studio project for small scale open spaces.

12. Mohammad Shaheer, Geeta Wahi Dua, Adit Pal, 'Landscape Architecture in India, A Reader'; LA,Journal of Landscape Architecture, 2013

Course outcomes (COs):

The students will be able to -

- a) Understand the fundamental concepts and ideas in the field of Landscape Architecture. (PO: 1; PSO: a)
- b) Explain basics of planting in Landscape Design. (PO: 1; PSO: a)
- c) Integrate Landscape Design in Architecture and Site Planning. (PO: 4; PSO: c)
- d) Explain the application of various philosophies in Landscape Design. (PO: 3; PSO: h)
- e) Develop Landscape designs for small scale projects. (PO: 4; PSO: c)

SEMESTER – V

STUDY TOUR

Course Code: AR508

Prerequisite: NIL

Course Coordinator: Assoc. Prof. Meghana Raj

Course Credits: 0 : 0 : 1

Contact hours: 42 hours

Course Objectives:

To expose the students to -

- Understand the evolution of the building process.
- Understand existing projects.
- Understand various elements of buildings and their transformation over the years.

Course Contents:

UNIT - I

Site visits to include Modern architectural styles, theories practiced through built spaces and their evolution and influences.

Study of materials used to be integral part of the site visits.

Course Outcomes (COs):

The students will be able to -

1. Measure and complete the measured drawing of simple buildings. (PO: 2; PSO: a)
2. Represent different elements of architecture. (PO: 10; PSO: g)
3. Translate their ideas in the form of drawings. (PO: 10; PSO: g)

Evaluation Pattern: Marks allocation for SEE

Subject Code	Subject Name	Portfolio	Viva
AR508	Study Tour	60	40

SEMESTER- VI

ARCHITECTURE DESIGN-V

Course Code: AR601

Prerequisite: Nil

Course Coordinator: Prof. Pushpa Devanathan

Course Credits: 6 : 0 : 1

Contact hours: 112 hours

Course Objectives:

To enable the students to -

- Understand the design principles of campus planning and large-scale projects
- Designs have to respond to climate, environmental and ecological factors. Site planning, landscape details, circulation and services, structural viability and interiors have to be addressed.

Course contents:

UNIT - I

Introduction to campus planning and Case studies of campuses. Data collection including relevant bye laws.

UNIT - II

Site analysis including analysis of contours.

UNIT - III

Site planning and developing the campus master plan.

UNIT - III

Detailing of a common major block like auditorium, library etc.

UNIT - IV

Detailing any two academic blocks.

Course Outcomes (COs):

The students will be able to –

- a) Understand the scale of campus plan and applicable bye laws. (PO: 2; PSO: a)
- b) Develop architectural design for built forms and unbuilt spaces in campus in cohesive manner. (PO: 3; PSO: b)
- c) Apply and integrate learning of contours detailing space, space planning principles in campus designing to develop master plan. (PO: 4; PSO: c)
- d) Integrate circulation, services, structural aspects in design and evolve interior details. (PO: 4; PSO: e)
- e) Respond to climate, environment, and ecological factors. (PO: 7; PSO: c)

Evaluation Pattern: Marks allocation for SEE

SEMESTER- VI

BUILDING MATERIALS & CONSTRUCTION TECHNOLOGY VI

Course Code: AR602

Course Credits: 3 : 0 : 1

Prerequisite: Nil

Contact hours: 70 hours

Course Coordinator: Prof. Vishwas Hittalmani

Course Objectives:

To enable students to –

- Comprehend and apply knowledge of advanced roofing technologies for large span and complex buildings.

Course contents:

UNIT - I

Space frames and Geodesic domes (drafting): Introduction to Space frames and Geodesic domes, components used, advantages and disadvantages, fixing details, construction details.

UNIT - II

RCC Folded plate, Large Span truss / steel portal frames (drafting): Introduction to RCC Folded plate and Large span truss, advantages and disadvantages, fixing details, construction details

UNIT - III

Tensile and Pneumatic structures and materials (sketching): Introduction to Tensile and Pneumatic structures, advantages and disadvantages, fixing details, construction details. Properties and usage of Synthetic material

UNIT - IV

Shell roofs and materials (sketching): Introduction to advantages and disadvantages of Shell roofs, fixing details, construction details.

UNIT - V

Properties and usage of Insulation materials– Thermal and Sound Insulation Materials, Fire retardant materials, ethylene tetrafluoroethylene.

11. Arthur Lyons, 'Materials for Architects and Builders'; Routledge, 2014

Course Outcomes (COs):

The students will be able to -

- a) Understand the working principles and construction details of Space frames and Geodesic domes. (PO: 2; PSO: c)
- b) Provide advanced roofing technologies for large span structures. (PO: 4; PSO: c)
- c) Formulate structural mechanics, design criteria and behaviour of Tensile and Pneumatic structures. (PO: 3; PSO: c)
- d) Explain design criteria and behaviour of Shell roofs. (PO: 1; PSO: b)
- e) Use innovative materials and details in construction. (PO: 3; PSO: e)

Evaluation Pattern: Marks allocation for SEE

AR602	Building Materials & Construction Technology VI	40	10

SEMESTER-VI

RESEARCH METHODOLOGY

Course Code: AR603

Course Credits: 2 : 0 : 0

Prerequisite: Nil

Contact hours: 28 hours

Course Coordinator: Assoc. Prof. Dr. Monalisa

Course Objectives:

To enable the students to -

- Understand concepts of research and its importance in the field of architecture.
- Understand the research methods and methodology.
- Know styles and format of writing research paper.

Course contents:

UNIT - I

Introduction of the subject and its relevance to architectural field and society, Introduction: Introduction to Research Methodology, Meaning of Research, Objectives, Types, Approaches, Significance, Tools.

UNIT - II

Research methods and methodology, Research process, Research design, Research hypothesis. Problem Definition, Objectives, Design, Data Collection, Data Analysis, Interpretation of Results, Validation of Results.

Research Problem Identification: Identification of Research Problem, Classroom Exercise of selecting a research problem, Identification of need to define research problem, Techniques involved in defining the Research Problems.

Research Hypothesis: Boundaries of Study, questions and possible hypothesis, formulation of a hypothesis

Research Design: Need, Characteristics of a good Design and related concepts, Types and Basic Principles of Research Designs: Classroom Exercises.

UNIT - III

Sampling fundamentals, measurement and scaling techniques, Data collection. Research Design: Selection of Research Approach, Designing of Sampling Plan, Experiments and Questionnaires, methods: Probability and Non-probability samples.

Sampling Design: need, types, methods, characteristics of a good sample design, steps in sampling design, criteria for selecting sampling procedure and random sample for an infinite universe – Urban Problems.

UNIT - IV

Data analysis and interpretation of results and report writing. Data Collection: Types and Collection Methods, Primary and Secondary data, sources of data, method to select appropriate data collection method. Significance, Steps, Layout of Report, Types of Reports, Mechanics of Writing, Precautions, Guidelines for reviewing drafts, Report formats, Typing Instructions

UNIT - V

Future research and role of computers in architecture. Classroom Exercise: Very Small Sample Classroom Research Project – 1 and enable students to get practically acquainted with the Research Methodology to carry out future researches.

6. Linda N. Groat, David Wang, 'Architectural Research Methods'; Wiley, 2013
7. Bill Schmalz, 'The Architect's Guide to Writing; For Design and Construction Professionals'; Images Publishing Group; 2014

Course Outcomes (COs):

The students will be able to -

- a) Conduct research on different aspects of the built environment. (PO: 2; PSO: h)
- b) Understand the steps involved in conducting research and their importance. (PO: 2; PSO: a)
- c) Identify the appropriate methods of sampling for the urban issues being researched. (PO: 4; PSO: h)
- d) Explore the process of research with respective data collection and data analysis. (PO: 4; PSO: h)
- e) Write reports or research papers. (PO: 4; PSO: g)

SEMESTER- VI

ESTIMATING AND COSTING

Course Code: AR604

Course Credits: 3 : 0 : 0

Prerequisite: Nil

Contact hours: 42 hours

Course Coordinators: Asst. Prof. Aruna Gopal

Course objectives:

To enable students to -

- To achieve proficiency in building estimation.
- To develop necessary skill for writing specification.
- To have practical knowledge of building industry, practice, and cost comparison

Course contents:

UNIT - I

Procedure of estimating – Method of building estimates; estimation of earth work, woodwork, road work, building, RCC roof, framed structure, steel truss, Mode of measurements

UNIT - II

Material statement – Estimating of quantities of materials like cement, sand, aggregate, brick, steel, structural steel for trusses, tiles, paints used in building

UNIT - III

Abstract specification; detailed specification for all items of works exposed in the construction of a compound wall, garage, residential building, office building, factory building with RCC roof, truss, Mangalore tiled roof etc; Specification of special items like false ceiling, decorative elements, flooring, wall cladding etc

UNIT - IV

Analysis of rates for items in building works. Local SR rates, market rates, measurement book, RA bill, interim and final certificate; Modifying S R rates to the changes in the cost of cement change in Land distance for different materials like sand, jelly, boulders etc.

UNIT - V

Estimation of a building using the given plan and specified items

References:

1. B. N. Dutta, 'Estimating and Costing in Civil Engineering'; UBS Publishers' Distributors Pvt Ltd, 2016
2. S. C. Rangwala, 'Estimating Costing and Valuation'; Charotar, 2009
3. Robert Peurifoy, Garold Oberlender, 'Estimating Construction Costs'; McGraw-Hill Education, 2013
4. M Chakraborti, 'Estimating, Costing, Specification & Valuation in Civil Engineering'; Chakraborti, 2006
5. D.D. Kohli, R C Kohli, 'A Textbook of Estimating and Costing'; S. Chand, 2013
6. A.K.Upadhyay, 'Civil Estimating & Costing: Including Quality Surveying, Tendering and Valuation'; S K Kataria and Sons, 2013
7. S.P.Mahajan, Sanjay Mahajan, 'Quantity Surveying And Valuation (Estimating, Costing And Contracting)'; Satya Prakashan, 2017
8. National building and other relevant codes

Course outcomes (COs):

Students will be able to -

- a) Estimate the quantity and cost of different components in a building. (PO: 2; PSO: b)
- b) Estimate quantities of materials required. (PO: 2; PSO: b)
- c) Provide specifications for different construction items. (PO: 2; PSO: b)
- d) Analyse rate analysis from first principles for various materials required for civil work. (PO: 4; PSO: e)
- e) Apply the acquired knowledge for a given building. (PO: 4; PSO: a)

SEMESTER- VI

ARCHITECTURAL STRUCTURES-VI

Course Code: AR605

Course Credits: 3 : 0 : 0

Prerequisite: Nil

Contact Hours: 42 hours

Course Coordinator: Asst. Prof. M. Vijayanand

Course Objectives:

To enable the students to -

- Understand the concept of Structural design and detailing of a Single storey Load bearing Wall residential building with staircase.
- Learn Drawing & detailing of the Structural elements designed in the residential building
- Analyze & Design a single bay portal frame structure
- Learn Drawing & Detailing of the designed Structural elements of the portal frame.

Course Contents:

UNIT - I

Design of Floor Slabs for Residential Building: Design of One-Way Slab, Two Way slab with corner restraints. Drawing of Slab Reinforcement details for a entire floor plan of a load bearing wall residential building.

UNIT - II

Staircase: Design & Drawing of the reinforcement details of dog legged staircase for a residential building.

UNIT - III

Lintel & Chajja: Design of the Chajjas & Lintels for a residential building. Drawing the reinforcement details for the lintel & chajja for the given plan of residential building.

UNIT - IV

Portal Frames: Analysis of single bay Portal frame structure. Analysis of design loads of various elements of portal frame. Calculation of the sizes of the portal frame elements. One-way continuous slabs: Design of the reinforcement details of one-way continuous slabs over a portal frame structure. Draw the slab reinforcement details. Design of Beam: Analysis & design of the intermediate Portal frame beam.

UNIT - V

Column design: Analysis & Design of columns in the portal frame.

Footing design: Analysis & design of footings in the portal frame. Drawing of the sectional elevations of entire portal frame with cross sectional details

References:

1. S Unnikrishna Pillai, Devdas Menon, 'Reinforced Concrete Design'; Tata Mc-Graw Hill, 2001
2. Varghese P.C, 'Limit State Design of Reinforced Concrete'; Prentice Hall India Learning Pvt. Ltd, 2008
3. N. Krishna Raju, R. N. Pranesh, 'Reinforced Concrete Design: IS:456-2000 Principles and Practice'; New Age International Pvt Ltd Publishers, 2018
4. David Fanella, 'Reinforced Concrete Structures: Analysis and Design'; McGraw-Hill Education, 2015
5. Ashwani Bedi, Ramsey Dabby, 'Structure for Architects: A Case Study in Steel, Wood, and Reinforced Concrete'; Routledge, 2019

Course Outcomes (COs):

The students will be able to –

- a) Describe and apply Limit State design concept in Reinforced Concrete elements. (PO: 4; PSO: c)
- b) Analyze, design and detailing of varieties of beams, lintels, chajja. (PO: 2; PSO: c)
- c) Analyze, design and detailing of slabs and staircase. (PO: 2; PSO: a)
- d) Analyze, design and detailing of columns in frame structure. (PO: 4; PSO: c)
- e) Analyze, design and detailing of foundations, footings in frame structure. (PO: 4; PSO: a)

Evaluation Pattern: Marks allocation for SEE

Subject Code	Subject Name	Portfolio	Viva
AR605	Architectural Structures VI	40	10

SEMESTER- VI

BUILDING SERVICES IV

Course Code: AR606

Prerequisite: Nil

Course Coordinator: Prof. Vishwas Hittalmani

Course Credits: 3 : 0 : 0

Contact hours: 42 hours

Course objectives:

To enable the students to –

- Achieve proficiency in application of sound control system in design and construction.
- Study modern and prospective materials used in acoustical design.
- Gain practical knowledge of architectural and environmental acoustics as per global requirement.

Course contents:

UNIT – I

Scope of acoustics, properties of sound, sound absorption and reflection.

UNIT – II

Study of behaviour of sound in enclosed spaces like seminar hall, auditorium, etc.

UNIT – III

Acoustical design and construction, study of materials and their applications

UNIT – IV

Environmental acoustics – noise control – noise isolation, traffic planning

UNIT – V

Control of mechanical noise and vibration in different circumstances.

References:

1. Leslie L. Doelle, 'Environmental Acoustics'; McGraw-Hill, 1972
2. Vern O. Knudsen, Cyril M. Harris, 'Acoustical Designing in Architecture'; Acoustical Society of Amer, 1980

8. T. E. Vigran, 'Building Acoustics'; CRC Press, 2008
9. William J. Cavanaugh, Gregory C. Tocci, Joseph A. Wilkes, 'Architectural Acoustics: Principles and Practices'; Wiley, 2010
10. Codes and standards –
 - National Building Code of India (NBC) 2016; Part 8 Section 4
 - IS 1950: 1962 Code of practice for sound insulation of non-industrial buildings
 - IS 3483: 1965 Code of practice for noise reduction in industrial buildings
 - IS 4954: 1968 Recommendations for noise abatement in town planning
 - IS 11050 (Part 1) 1984: Rating of sound insulation in buildings and of building elements: Part 1 Airborne sound insulation in buildings and of interior building elements
 - IS 11050 (Part 2)1984: Rating of sound insulation in buildings and of building elements: Part 2 Impact sound insulation
 - IS 2526, 1963: Code of practice for acoustical design of auditoriums and conference halls

Course outcomes (COs):

The students will be able to -

- a) Explain the fundamentals of acoustics in building design. (PO: 1; PSO: b)
- b) Apply the understanding of sound behaviour in designing enclosed spaces. (PO: 3; PSO: c)
- c) Design the acoustics of a space for the desired function with appropriate acoustic materials. (PO: 3; PSO: c)
- d) Apply the knowledge of environmental acoustics to design acoustics of outdoor spaces. (PO: 7; PSO: c)
- e) Design and execute the acoustic design and detailing in buildings. (PO: 3; PSO: c)

SEMESTER- VI

DISASTER MANAGEMENT

Course Code: AR607

Prerequisite: Nil

Course Coordinator: Prof. Vishwas Hittalmani

Course Credits: 2 : 0 : 0

Contact hours: 28 hours

Course Objective:

- To provide awareness about disaster prevention measures in buildings and introduction to building safety from natural hazards and other hazards.

Course contents:

UNIT - I

Introduction to earthquakes, cyclones, floods, landslides.

UNIT - II

Prevention measures and their impact on buildings.

UNIT - III

Site planning, building forms and architectural design concepts for earthquake resistance of buildings

UNIT - IV

Retrofitting of buildings and dampers.

UNIT - V

Safety considerations in building and importance of construction details.

 IS: 1893-2002, IS: 13920-1993, IS: 456-2000, IS: 800-2007 Seismic Design and Detailing of RC and Steel Structures

Course Outcomes (COs):

The students will be able to -

- a) Explain the phenomenon of disaster. (PO: 2; PSO: a)
- b) Characterise the impact of disasters on buildings. (PO: 2; PSO: a)
- c) Execute the mitigation strategies for a disaster and its impact on buildings. (PO: 3; PSO: c)
- d) Design buildings implementing the principles of earthquake resistance. Understand the procedure of retrofitting post calamity. (PO: 3; PSO: c)
- e) Design a disaster relief shelter or building based on guidelines of disaster resistant and mitigation strategies. (PO: 4; PSO: e)
